PROFESSIONAL SUMMARY

Third-year Bachelor of Information & Communication Technology (BICT) undergraduate at the University of Colombo seeking a Data Engineering, Data Analyst or Cloud Data internship. Hands-on experience building ETL and streaming data pipelines with Python (Pandas), SQL, PostgreSQL, Apache Kafka and Docker, and turning data into insights with Power BI, DAX and Grafana dashboards. Completed an AWS/Azure cloud internship delivering four applied AWS projects (S3, EC2, DynamoDB, Lambda) and an AWS Academy Data Engineering graduate. Basic understanding of Agile and Microsoft Office. Analytical, detail-oriented and quick to learn.

TECHNICAL SKILLS

Data Engineering: ETL Pipelines, Data Pipelines, Apache Kafka (streaming), Data Cleaning, Data Validation, Data Integrity, PostgreSQL, SQLite, DynamoDB (NoSQL), SQL, Python (Pandas), REST APIs

Data Analysis : Power BI, DAX, Microsoft Excel, Grafana, Exploratory Data Analysis, KPI Development, Data Visualization, Reporting, Dashboards, Business Insights

Cloud & DevOps: AWS (EC2, S3, DynamoDB, Lambda, CloudWatch, IAM), Microsoft Azure, Docker, Docker Compose, Git, GitHub, Linux, Apache, SSH

Programming & Tools: Python, SQL, Java, JavaScript, C, HTML, CSS, VS Code, Postman, Microsoft Office

Professional Skills: Problem Solving, Analytical Thinking, Agile Methodology (basic understanding), Documentation, Teamwork, Leadership, Curiosity, Attention to Detail

PROFESSIONAL EXPERIENCE

Cloud Computing (AWS/Azure) Intern

Jul 2026 – Aug 2026

Decode Labs (Remote) | github.com/Rashmina-KA/DecodeLabs-Internship

- Delivered four applied AWS projects across storage, compute, databases and serverless computing, and earned a verified Certificate of Completion.
- Built and tested a Python AWS Lambda function and set up CloudWatch log monitoring to track executions and catch failures, reducing manual debugging effort.
- Designed an Amazon DynamoDB NoSQL table (partition key: Email), then inserted and validated sample records and verified data integrity in the AWS Management Console.
- Provisioned and secured an EC2 Ubuntu instance (SSH access, Apache installation, security group rules limiting inbound traffic to required ports), producing a publicly accessible, hardened webpage.
- Resolved bucket-policy and public-access issues independently to deploy a static website on Amazon S3, strengthening troubleshooting skills under AWS IAM constraints.
- Documented all project work in a public GitHub repository.

PROJECTS

Near-Real-Time Weather Data Pipeline : Python, Kafka, PostgreSQL, Grafana, Docker Compose

- Designed and containerized a six-component streaming pipeline (Open-Meteo API, Python producer, Kafka, Python consumer, PostgreSQL, Grafana) using Docker Compose.
- Streamed live weather data through Kafka into PostgreSQL and visualized it in an auto-refreshing Grafana dashboard tracking temperature, humidity and wind speed.

Mini Data Engineering ETL Pipeline : Python, Pandas, SQLite, SQL

- Built an ETL pipeline in Python and Pandas to extract raw sales data from CSV, validate and transform it, handle duplicates and missing values, and calculate sales metrics.

- Loaded the cleaned data into SQLite and used SQL to analyze revenue by product and customer city.

E-Commerce Sales Analytics : Python, Pandas, SQL, PostgreSQL, Power BI, DAX

- Analyzed a 9,994-record Superstore sales dataset end to end: data cleaning and KPI development in Pandas, business analysis in PostgreSQL/SQL, and a 3-page interactive Power BI dashboard.
- Defined KPIs (profit margin, discount impact, regional performance) and translated findings into actionable business recommendations, including a 12.47% overall profit margin, negative margins at 30%+ discount levels, and the weakest regional performance in Central at about 7.92% margin.

JSONPlaceholder REST API Testing : Postman, REST API

- Built an automated Postman test suite covering GET, POST, PUT and DELETE requests, with assertions on status codes and response bodies.
- Used environment variables and negative test cases, and ran the full collection with Collection Runner.

EDUCATION

Bachelor of Information & Communication Technology (Hons.) – BICT 2023 – Present
Faculty of Technology, University of Colombo | 3rd Year Undergraduate

G.C.E. Advanced Level Examination 2023
Mahinda Rajapaksa College, Homagama

- Information & Communication Technology: A, Science for Technology: A, Bio System Technology: A | District Rank 15, Island Rank 89

G.C.E. Ordinary Level Examination 2019
Sri Palee College, Horana | 4A, 3B, 2C

Association of Accounting Technicians of Sri Lanka (AAT) 2021
Level 1 passed

CERTIFICATIONS & TRAINING

- AWS Academy Graduate – Data Engineering, AWS Training and Certification (2026)
- Cloud Computing (AWS/Azure) Virtual Internship, Certificate of Completion, Decode Labs (Aug 2026)
- Introduction to End-to-End Analytics using Microsoft Fabric, Microsoft Learn (2026)
- Get Started Building with Power BI, Microsoft Learn (2026)
- Explore AI for All (Azure AI Fundamentals) and Introduction to Machine Learning Concepts, Microsoft Learn (2026)
- Introduction to Data Science, Alison (2026)
- Python for Beginners, CODL, University of Moratuwa (Apr 2026)
- Cloud Security Fundamentals, Palo Alto Networks (2026); DevOps 101, Simplilearn (2026);
- Linux Fundamentals RH104, Red Hat (2026); Cybersecurity Fundamentals; Cisco Packet Tracer (Mar 2026)
- Microsoft Student Champs, Microsoft Learn Student Ambassadors Sri Lanka (Jul 2026); Microsoft Foundry: Engineering the Next Generation of AI Agents, FoundryX Special Edition (Sep 2026)
