

K.A. ADINI RASHMINA

Cloud Engineer Intern Candidate | AWS | Python Automation | BICT Undergraduate

Bandaragama, Sri Lanka | +94 70 391 6986 | adinirashmina@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | [Microsoft Learn Profile](#)

PROFESSIONAL SUMMARY

Third-year BICT undergraduate (University of Colombo) with hands-on AWS cloud infrastructure experience from a one-month AWS/Azure virtual internship, provisioning and securing compute (EC2, VPC, security groups), storage (S3), serverless (Lambda, CloudWatch), and NoSQL database (DynamoDB) resources across four applied projects. Comfortable with Python automation and scripting, Linux system administration, Docker containerization, and cloud security fundamentals, with growing exposure to Generative AI and LLM concepts through Microsoft Foundry AI Agents training and Microsoft Learn's Machine Learning Concepts coursework. Additional experience building data pipelines and dashboards with Power BI and Grafana. Seeking a Cloud Engineer Internship to build production-grade skills in CI/CD, Infrastructure as Code, and enterprise cloud environments.

TECHNICAL SKILLS

- **Cloud & Infrastructure:** AWS (EC2, S3, DynamoDB, Lambda, CloudWatch, IAM, VPC, Security Groups), Microsoft Azure Fundamentals & AI Fundamentals, VM Provisioning, Access Control
- **Automation & DevOps:** Python scripting, Docker, Docker Compose, Git, GitHub, CI/CD concepts, Linux (Red Hat) system administration
- **Networking & Security:** VPC & network fundamentals, Cisco Packet Tracer, Cloud Security, Zero Trust principles, Cybersecurity fundamentals
- **AI & Data:** Generative AI & LLM fundamentals (Microsoft Foundry AI Agents), Machine Learning concepts, Power BI, DAX, Grafana, PostgreSQL, SQL, Pandas
- **Programming Languages:** Python, Java, JavaScript, HTML, CSS, C
- **Soft Skills:** Problem Solving, Analytical & Creative Thinking, Communication, Teamwork, Leadership, Curiosity

EXPERIENCE

Cloud Computing (AWS/Azure) Intern — Decode Labs (Remote)

Jul 2026 – Aug 2026

Repository: github.com/Rashmina-KA/DecodeLabs-Internship

- Completed a hands-on virtual internship delivering four applied AWS projects spanning storage, compute, databases, and serverless computing, earning a verified Certificate of Completion.
- Diagnosed and resolved IAM bucket-policy and public-access misconfigurations to independently deploy a fully accessible static portfolio website on Amazon S3, strengthening hands-on troubleshooting under AWS IAM constraints.
- Provisioned and hardened an EC2 Ubuntu instance end-to-end — SSH access, Apache web server installation, and VPC security-group rules restricting inbound traffic to required ports only — resulting in a publicly accessible, secured webpage.
- Designed a DynamoDB NoSQL schema (partition key: Email), then inserted, queried, and validated sample records via the AWS Management Console to ensure data integrity and production-readiness.
- Built and deployed a Python-based AWS Lambda function with CloudWatch log monitoring, proactively surfacing execution failures in real time and reducing manual debugging effort.

PROJECTS

[Near-Real-Time Weather Data Pipeline](#) - Python, Apache Kafka, PostgreSQL, Grafana, Docker Compose, Open-Meteo API

- Designed and containerized an end-to-end streaming pipeline (Open-Meteo API → Python producer → Kafka → Python consumer → PostgreSQL → Grafana) using Docker Compose, powering an auto-refreshing dashboard tracking temperature, humidity, and wind speed.

E-Commerce Sales Analytics - *Python, Pandas, SQL, PostgreSQL, Power BI, DAX*

- Analyzed a 9,994-record Superstore sales dataset end-to-end — data cleaning and KPI development in Pandas, business analysis in PostgreSQL/SQL, and a 3-page interactive Power BI dashboard.
- Surfaced key insights (12.47% overall profit margin, negative margins at 30%+ discount levels, weakest regional performance in Central at ~7.92% margin) and translated them into actionable business recommendations.

JSONPlaceholder REST API Testing - *Postman, REST API*

- Built an automated Postman test suite covering GET, POST, PUT, and DELETE requests with status-code and response-body assertions, environment variables, negative testing, and Collection Runner execution.

EDUCATION

Bachelor of Information & Communication Technology (Hons.) – BICT

Faculty of Technology, University of Colombo — Undergraduate, 3rd Year (2023 – Present)

G.C.E. Advanced Level Examination — Mahinda Rajapaksa College, Homagama 2022(2023):

ICT – A, Science for Technology – A, Bio System Technology – A | District Rank 15, Island Rank 89

G.C.E. Ordinary Level Examination – Sri Palee College, Horana (2019)

4A, 3B, 2C

Association of Accounting Technicians of Sri Lanka (AAT):

Level 1 passed (2021); Level 2 in progress

CERTIFICATIONS & TRAINING

- AWS Academy Graduate — Data Engineering, AWS Training and Certification (2026)
- Cloud Computing (AWS/Azure) Virtual Internship — Certificate of Completion, Decode Labs (Aug 2026)
- Cloud Security Fundamentals, Palo Alto Networks (2026)
- Explore AI for All (Azure AI Fundamentals), Microsoft Learn (2026)
- Getting Started with Linux Fundamentals (RH104), Red Hat Training (2026)
- Introduction to Machine Learning Concepts, Microsoft Learn (2026)
- Microsoft Foundry: Workflow & Engineering the Next Generation of AI Agents — Verified Attendee, Microsoft Student Champs FoundryX (Sep 2026)
