PROFESSIONAL SUMMARY

Third-year BICT undergraduate seeking a Data Analyst Intern position, with hands-on experience in Python, Pandas, SQL, PostgreSQL, Power BI, DAX and Microsoft Excel. Experienced in data cleaning, data analysis, visualization, dashboard development, KPI reporting, and translating findings into business insights through a 9,994-record sales analytics project. Familiar with Tableau at a foundational level and trained in Data Science, Power BI, and Microsoft Fabric. Interested in applying analytical thinking, data storytelling, and technical skills in a data-driven organization while continuing to develop in Data Analytics, Data Engineering, and Business Intelligence.

EDUCATION

Bachelor of Information & Communication Technology (Hons.) – BICT

2023 – Present

Faculty of Technology, University of Colombo — Undergraduate, 3rd Year

G.C.E. Advanced Level Examination – Mahinda Rajapaksa College, Homagama

2023

- Information & Communication Technology – A, Science for Technology – A, Bio System Technology – A
- District Rank: 15 | Island Rank: 89

G.C.E. Ordinary Level Examination – Sri Palee College, Horana

2019

- 4A, 3B, 2C

Association of Accounting Technicians of Sri Lanka (AAT)

- Level 1 (Passed): Business Environment – B, Economics – C, Business Mathematics & Statistics – C, Financial Accounting – D
- Level 2: Business Law – A, Business Management – B

EXPERIENCE

Cloud Computing (AWS/Azure) Intern — Decode Labs

Jul 2026 – Aug 2026 (Remote)

Repository: github.com/Rashmina-KA/DecodeLabs-Internship

- Internship Overview:** Completed a hands-on virtual internship delivering four applied AWS projects across storage, compute, database, and serverless services, earning a verified Certificate of Completion.
- Database & Data Management:** Designed an Amazon DynamoDB table with a defined partition key, inserted sample records, and verified data integrity through the AWS Management Console — practical exposure to structured data storage and validation.
- Cloud Infrastructure:** Provisioned an AWS EC2 server and Amazon S3 storage, configuring access permissions and troubleshooting configuration issues independently.
- Automation & Monitoring:** Built and tested a Python-based AWS Lambda function and monitored logs using AWS CloudWatch, strengthening Python scripting and attention to data accuracy.

PROJECTS

(Click titles to view repository)

[E-Commerce Sales Analytics](#)

Python, Pandas, SQL, PostgreSQL, Power BI, DAX

- Analyzed a 9,994-record Superstore sales dataset end-to-end — data exploration, cleaning, and KPI development in Pandas, followed by SQL-based analysis in PostgreSQL across categories, regions, and customer segments.

- Built a 3-page interactive Power BI dashboard with DAX measures and slicers, and surfaced key business insights (12.47% overall profit margin, negative margins at 30%+ discount levels, weakest regional performance in Central) translated into actionable recommendations.

Near-Real-Time Weather Data Pipeline

Python, Apache Kafka, PostgreSQL, Grafana, Docker Compose, Open-Meteo API

- Designed an end-to-end data pipeline (Open-Meteo API → Python producer → Kafka → Python consumer → PostgreSQL → Grafana) to collect, store, and visualize live weather data.
- Built an auto-refreshing Grafana dashboard tracking temperature, humidity, and wind speed, gaining practical exposure to real-time data querying and visualization.

JSONPlaceholder REST API Testing

Postman, REST API

- Built an automated Postman test suite covering GET, POST, PUT, and DELETE requests with status-code and response-body assertions, environment variables, negative testing, and Collection Runner execution.

CERTIFICATIONS & TRAINING

-
- Alison – Introduction to Data Science (data science processes, data modeling, analytical thinking)
 - Microsoft Learn – Get Started Building with Power BI
 - Microsoft Learn – Introduction to End-to-End Analytics using Microsoft Fabric
 - AWS Academy Graduate – Data Engineering, AWS Training and Certification
 - Decode Labs – Certificate of Completion, Cloud Computing (AWS/Azure) Virtual Internship (2026)
 - CODL, University of Moratuwa – Python for Beginners
 - Microsoft Learn – Introduction to Machine Learning Concepts; Explore AI for All
 - Cybersecurity Fundamentals – Modern Threat Landscape, Zero Trust & Security Operations
 - Red Hat Training – Getting Started with Linux Fundamentals (RH104)
 - Cisco Networking Academy – Getting Started with Cisco Packet Tracer (2026)
 - Palo Alto Networks – Cloud Security Fundamentals
 - Simplilearn – DevOps 101 Certificate

TECHNICAL SKILLS

Data Analysis: Python (Pandas), SQL, PostgreSQL, Data Cleaning, Exploratory Data Analysis, KPI Development

Business Intelligence & Visualization: Power BI, DAX, Grafana, Microsoft Fabric, Dashboard Design

Microsoft Office: Excel (Formulas, Pivot Tables, Basic Data Analysis), Word, PowerPoint, Outlook

Programming: Python, Java, JavaScript, C, HTML/CSS

Cloud & Data Storage: AWS (S3, DynamoDB, EC2, Lambda, CloudWatch), Microsoft Azure Fundamentals

Tools & Platforms: Git & GitHub, Docker, VS Code, Linux (Red Hat Fundamentals)

Soft Skills: Analytical Thinking, Attention to Detail, Communication, Curiosity, Teamwork
