

K.A. ADINI RASHMINA

BICT Undergraduate | Aspiring Network & Systems Engineer

Bandaragama, Sri Lanka | +94 70 391 6986 | adinirashmina@gmail.com | [LinkedIn](#) | [GitHub](#) | [Microsoft Learn Profile](#)

PROFESSIONAL SUMMARY

Third-year BICT undergraduate with hands-on experience in cloud infrastructure, Linux systems, server administration, monitoring, and foundational networking through academic, personal, and internship projects. Experienced in provisioning and administering AWS EC2 Linux servers using SSH, configuring Apache web servers, managing cloud resources, and working with Docker and monitoring tools. A curious and self-motivated learner who enjoys understanding how systems work, exploring new technologies, and independently applying what I learn to practical projects. Seeking an internship opportunity to strengthen my skills in network and systems engineering while gaining hands-on industry experience.

EXPERIENCE

Cloud Computing (AWS/Azure) Intern — Decode Labs (Remote)

Jul 2026 – Aug 2026

Repository: github.com/Rashmina-KA/DecodeLabs-Internship

- Completed a hands-on virtual internship delivering four applied AWS projects spanning storage, compute, databases, and serverless computing, earning a verified Certificate of Completion.
- Independently resolved bucket-policy and public-access misconfigurations to deploy a static portfolio website on Amazon S3 with full public accessibility — strengthening troubleshooting skills under AWS IAM constraints.
- Provisioned and secured an EC2 Ubuntu instance end-to-end: SSH access, Apache web server installation, and security group rules restricting inbound traffic to required ports only, resulting in a publicly accessible, hardened webpage.
- Designed an Amazon DynamoDB NoSQL table (partition key: Email), inserted and validated sample records, and verified data integrity via the AWS Management Console.
- Built and tested a Python-based AWS Lambda function, then implemented CloudWatch log monitoring to track executions and catch failures — reducing manual debugging effort.

PROJECTS

[Near-Real-Time Weather Data Pipeline](#) — Python, Apache Kafka, PostgreSQL, Grafana, Docker Compose, Open-Meteo API

- Designed and containerized an end-to-end streaming pipeline (Open-Meteo API → Python producer → Kafka → Python consumer → PostgreSQL → Grafana) using Docker Compose, ingesting live weather data into an auto-refreshing dashboard tracking temperature, humidity, and wind speed.

[E-Commerce Sales Analytics](#) — Python, Pandas, SQL, PostgreSQL, Power BI, DAX

- Analyzed a 9,994-record Superstore sales dataset end-to-end — cleaning and KPI development in Pandas, business analysis in PostgreSQL/SQL, and a 3-page interactive Power BI dashboard.
- Surfaced key insights (12.47% overall profit margin, negative margins at 30%+ discount levels, weakest regional performance in Central at ~7.92% margin) and translated them into actionable business recommendations.

[JSONPlaceholder REST API Testing](#) — Postman, REST API

- Built an automated Postman test suite covering GET, POST, PUT, and DELETE requests with status-code and response-body assertions, environment variables, negative testing, and Collection Runner execution.

EDUCATION

Bachelor of Information & Communication Technology (Hons.) – BICT

Faculty of Technology, University of Colombo — Undergraduate, 3rd Year (2023 – Present)

G.C.E. Advanced Level Examination — Mahinda Rajapaksa College, Homagama (2023)

- Information & Communication Technology – A, Science for Technology – A, Bio System Technology – A | District Rank 15, Island Rank 89

G.C.E. Ordinary Level Examination — Sri Palee College, Horana (2019)

- 4A, 3B, 2C

Association of Accounting Technicians of Sri Lanka (AAT): Level 1 passed (2021); Level 2 in progress.

CERTIFICATIONS & TRAINING (2026)

- Cloud Computing (AWS/Azure) Virtual Internship - Certificate of Completion - DecodeLabs (Aug 2026)
- Microsoft Student Champs - Certificate of Participation - Microsoft Learn Student Ambassadors Sri Lanka (Jul 2026)
- Microsoft Foundry: Workflow & Engineering the Next Generation of AI Agents — Verified Attendee — Microsoft Student Champs, FoundryX Special Edition (Sep 2026)
- Explore AI for All (Azure AI Fundamentals) - Microsoft Learn (2026)
- Introduction to End-to-End Analytics using Microsoft Fabric - Microsoft Learn (2026)
- Get Started Building with Power BI - Microsoft Learn (2026)
- Introduction to Machine Learning Concepts - Microsoft Learn (2026)
- AWS Academy Graduate — Data Engineering - AWS Training and Certification (2026)
- Cloud Security Fundamentals - Palo Alto Networks (2026)
- Cybersecurity Fundamentals - Modern Threat Landscape, Zero Trust & Security Operations - Self-paced course (2026)
- Getting Started with Cisco Packet Tracer - Cisco Networking Academy (Mar 2026)
- Getting Started with Linux Fundamentals (RH104) - Red Hat Training (2026)
- DevOps 101 Certificate - Simplilearn (2026)
- Introduction to Data Science - Alison (2026)
- Python for Beginners - CODL, University of Moratuwa (Apr 2026)

TECHNICAL SKILLS

Cloud & Infrastructure: AWS (EC2, S3, DynamoDB, Lambda, CloudWatch, IAM), Microsoft Azure Fundamentals & AI Fundamentals, VM Provisioning, Security Groups, Access Control

Networking & Security: Cisco Packet Tracer, Network Fundamentals, Cloud Security, Zero Trust, Cybersecurity Fundamentals

Programming & Systems: Python, Java, JavaScript, HTML, CSS, C, Linux (Red Hat), Docker, Docker Compose, Git, GitHub, VS Code

Data & Monitoring: Power BI, DAX, Grafana, Microsoft Fabric, PostgreSQL, SQL, Pandas

Soft Skills: Problem Solving, Analytical & Creative Thinking, Curiosity, Communication, Teamwork, Leadership
